API Keys

Places API and Map SDK use API keys to authenticate. You have up to five keys per project. [Learn more](#) about Places API authentication.

App Keys

App analytics

You can use these keys to consume all our Self-Service APIs. To learn more about how our APIs work check the [get started](#) section.

Note: After moving to production, don't forget to update your app with the production keys and the base URL. Be informed that it may take up to 30 minutes before your API Keys are active once you have them.

Important: Don't add any personal info when testing this app in Sandbox.

Test keys | Base URL: test.api.amadeus.com

API Key

JVtqd5gwZe0oUVMpH9bUM4cmAoZuQgZm

API Secret

.....

Production key not requested

You are only using our testing environment for this app.

Note: After moving to production, don't forget to update your app with the production keys and the base URL

Get production environment

Be informed that it mat take up to 30 minutes before your API keys are active once you have them.
